

MODEL TRUCK DECALS FOR HO SCALE

Model truck decals for 1/87th models are adhesive on very thin adhesive material. They do not require any water to transfer to model. Just a pair of tweezers and or a exacto type no 11 knife. If you wish a very very sparing amount of water can be used. Be careful :too much can cause adhesive to weaken. They will snuggle down over rivets and ribs fairly well. Use your finger or a hair dryer to set. Not too much heat just a little is all that is needed.

Most carrier names come in both 40 foot semi and 28 ft doubles. Sets include enough for a complete semi or set of doubles. Some sets have extra items included for your use. Decals are designed to fit Promotex/Con-Cor/Herpa style trailers.
